

KOWAL is a community driven token created in 2018. Creator Kowalski (Portfel Kowalskiego [Twitter]) rewards holders with his token and builds around it a crypto world enthusiasts community. It's a social project with some sentimental value for the creator, so it should not be treated like an ordinary money/currency. Its target is to build strong bond between holders, where most important is to share the knowledge about blockchain technology.

Kowalski Token in current form may be used on VITE chain

Total supply: 800 000

Creator treasury ≈ 500 000

Decimals: 2

Token ID: tti_ea4d0148c620b9339d99e98e

#VITE chain

It is a modern network with high bandwidth, scalable and with very low latency, allowing execution up to 1172 transactions per second. VITE is based on DAG (Directed Acyclic Graph) technology that provides every wallet on the web own blockchain. Instead of forcing miners to compete for creating new blocks, it only gives the right to create them to the owner of that particular blockchain. This enables a much faster execution speed compared to other chains.

In short, the DAG architecture increases scalability, consumes way less energy compared to other networks, there are no fees for transfer of funds and allows for micro-transactions.

#WALLETS

It can be stored on VITE wallet. The app is available for android and IOS smartphones.

#EXCHAGES

It can be traded on VITEX dex in pair to VITE (accessible directly from VITE wallet on a mobile, PC or browser app)

#DISTRIBUTION

Token is being distributed with a use of airdrops, events or games. Moreover, in near future it will be available to earn by staking liquidity pools token.

Every year it's planned to distribute 50k tokens among community members, till whole supply will be given away. If it turns out that 50k was not distributed, then leftovers will be burned. Thanks to that total supply will be lower, which will grant maintaining token's value and will counteract to inflation.

###

Token will provide its holders good start in blockchain world and give them opportunity to buy some products and services with it. If you want to be up to date, it's worth to follow Twitter account @portfelK. Thanks to cooperation with other projects, Kowalski token value will increase with time, which should favor all hodlers. This way KOWAL will become scarce and desirable asset. Distribution of a token is done for free via social media such as Twitter or Discord.

Creator takes no responsibility for token holder's actions, regarding the nature of its use.

Buy or trading with crypto currency tokens is a very high investment risk and can expose you to losses of assets. You trade at your own risk.
